

**SRR & CVR GOVERNMENT DEGREE COLLEGE  
(AUTONOMOUS)  
MACHAVARAM, VIJAYAWADA-520004  
DEPARTMENT OF ZOOLOGY**

**MOU activities with DVS BIO-ORGANIC PRODUCTS**

- SRR & CVR Government Degree College (A) entered the MOU with ICAR Regional Fresh Water Research Institute, Penamaluru.
- As a part of MOU our college students of II B.Sc BZC had as **Field visit to DVS BIO- ORGANIC Products** Vanukuru, Penamaluru Mandal, and Krishna District on 20/02/2018.

Vermicompost is known to be the world's best fertilizer. Vermicomposting is a method of preparing enriched compost with the use of earthworms. It is one of the easiest methods to recycle agricultural wastes and to produce quality compost.

Earthworms consume biomass and excrete it in digested form called worm casts. Worm casts are popularly called as Black gold. The casts are rich in nutrients, growth promoting substances, beneficial soil micro flora and having properties of inhibiting pathogenic microbes. Vermicompost is stable, fine granular organic manure, which enriches soil quality by improving its physicochemical and biological properties. It is highly useful in raising seedlings and for crop production. Vermicompost is becoming popular as a major component of organic farming system. Using Vermicompost can fulfil the requirements for organically grown products.

Students were explained about the procedure for establishing the shed. They were got the practical experience of making vermicompost. They studied about the species required for the vermicompost preparation. Over all procedure of preparing vermicompost was explained very clearly by the proprietor of the company.
