**EXCEL PRACTICAL DEMO**

**Department of Statistics**

**1-11-2017**

In Excel there are rows and columns in the data sheet, every cell is an active cell if the data is typed and if we want to utilize any function we have to select the data and respective function is entered so that result will be obtained .

ex. ctrl c, ctrl. v, ctrl x are used for copy,paste,cut. ....etc. This is displayed on the screen using keyboard at ICT class on 1-11-2017.
